WWW.3SQUARED.COM/FLEETCONNECTOR

Affordable real time vehicle tracking, collection and delivery, performance measurement software. Available for iPhone and Android.

WHAT IS FLEETCONNECTOR?

FleetConnector is a cloud based tracking solution, which allows organisations operating within the logistics, transport and haulage industry to manage and track their fleet of vehicles efficiently, providing users with real time visibility and performance measurement.

FleetConnector can be used on any smartphone device and can be integrated with your existing Traffic Management (TMS) or scheduling system.

It offers real time vehicle tracking, up to date traffic data and provides accurate collection and delivery information. It also allows drivers to report incidents directly through the application, or any issues remotely through their mobile device.

FleetConnector enables companies to deploy vehicle tracking and performance measurement within their business to drivers, whether employed or subcontracted, through any smartphone without the need for any expensive fixed proprietary in-cab hardware.

FleetConnector benefits include:

> Works on any smartphone

> Delivers real time view of drivers progress

> Automatic capture of arrival and departure times

> Document/POD picture capture

> Web based management dashboard

> Performance Reporting

> Provides detailed Collection and Delivery information available to drivers

FEATURES AT A GLANCE...

Real Time Vehicle Tracking

Using satellite GPS technology built into the smartphone. Vehicles are tracked and displayed real time on Google Maps within the FleetConnector management web portal.

Document Capture

Drivers are able to photograph documents and instantaneously upload them to the FleetConnector management web portal, making them available for viewing by anyone immediately.

Web Portal

Accessible through the common web browser, the FleetConnector management web portal provides a simple interface for real time tracking, performance management, job scheduling and the ability to manage contractors/drivers and associated information such as drivers licenses, course expiration dates, assessment data, MOTs and much more.

View collection/delivery Information

FleetConnector can be integrated directly with your existing Traffic Management (TMS) or scheduling system to provide drivers direct access to specific collection or delivery information including any safety or technical documents. Not got a TMS? The FleetConnector management web portal provides an interface to manually create and deploy collection and delivery information directly to drivers or alternatively you can import directly from a Microsoft Excel Spread sheet.

Custom Branding

Thanks to it's flexible design it's possible to easily customise the visuals of both the FleetConnector web management portal and mobile application to match the style, colours and branding of your business.

FleetConnector is an affordable, easy to use track, trace and performance measurement software solution.
