

Allow passengers to travel with confidence

RailSmart Trainset & Timetables – transform the information provided by Network Rail into a user-friendly, accessible timetable

With RailSmart T&T, you have the power to customise your timetable's look and layout to perfectly align with your company's unique preferences. Take full control over the information displayed and the crucial details communicated to your passengers. Whether you opt to personally supervise this transformation or entrust it to our capable hands, rest assured 3Squared possess the expertise to handle any significant modifications or temporary adaptations.

To cater to the majority of passengers who prefer accessing timetables online, especially on mobile devices, RailSmart T&T has you covered. The system complies with Web Content Accessibility Guidelines (WCAG) 2.1 and ensures that all timetables are compatible

with screen readers, enabling visually impaired passengers to navigate through columns and rows effortlessly. This way, they are not at a disadvantage when planning their journeys.

Furthermore, our cutting-edge system has the capability to effortlessly produce PDF duplicates for convenient printing either at the station or at home, should the need arise.

RailSmart T&T empowers your customers to travel confidently by utilising the timetable to gauge the train's usual occupancy. By incorporating colour-coded train loading information into the timetable grid, passengers can easily determine the optimal time to travel.

Click our client logo's below and see how they are utilising RailSmart T&T:

Empower passengers to travel confidently

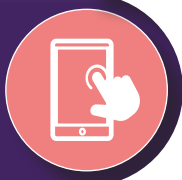

Provide a customised and user-friendly timetable to passengers.

RailSmart Trainset & Timetables allows you to **empower passengers to travel confidently** by:
