Unlock the power of your data with Insights

EDS-Insights – A data analytics solution

EDS-Insights provides access to the data you need, giving an over arching view of your team and wider organisation. Use your data to drive meaningful interventions that improve outcomes.

Assessments and Incidents

Understand where your risks are using interactive dashboards displaying key data.

EDS-Insights **assessments and incidents** allow you to:

- Filter data by teams and regions.
- Filter by criteria receiving most major and minor assessment feedback.
- Review incident by number, time period and type.
- Focus on areas of concern and potential improvement.

Performance and Support Plans

Drill through data in charts and tables to understand what is really happening and help drive operational improvements.

EDS- Insights **performance and support plans** allow you to:

- Analyse performance data recorded over time.
- View trends and identify areas for improvement.
- Monitor number of employees on Support Plans by team, depot, region and plan status.
- Stay on top of actions, progress and planned improvements.

Key Status and Verification

A single point of truth that makes information available instantly to key stakeholders and supervising managers.

EDS-Insights **key status and verification** allows you to:

- Understand the full picture on key employee data flags such as Authority to Work and Safety Critical Status.
- Stay on top of assessment verification.
- Track through analysing by team, location or even assessor.
